## Hydraulic Injector Puller System

- A NEW concept for the removal of stubborn injectors
- Provides controlled force to aid the removal of seized injectors where there is insufficient access for traditional slide hammers
- Uses a multi-position frame, with adjustable legs of different lengths and a selection of mounting adaptors to allow alignment of the tool with the injectors on a wide variety of modern diesel engines
- The combination of variable leg lengths and selection of the appropriate adaptor for the cylinder head, allows the tool to be correctly positioned on most cylinder heads
- Supplied with injector adaptors for most modern injector types – M14 | M16 | M17 | M20 | M25 | M27
- 10 tonnes Hydraulic Hollow Cylinder provides the force – use with standard hydraulic pump (not supplied)
